PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPER

Vitrafy Life Sciences Limited, Melbourne

NOVEMBER 2023 - PRESENT

Startup Phase / Proof of concepts

- Built scalable AWS cloud prototypes and interactive frontend features using Vue.js, Bootstrap Vue, and Node.js, including a scheduling calendar with drag-and-drop task creation, equipment inventory integration, and location-based UI customization.

Project Delivery / Enterprise Implementation (ASX : VFY)

- Built enterprise-grade web applications using React, TypeScript, Next.js, and Node.js, developing responsive and user-friendly interfaces aligned with modern UI/UX practices.
- Implemented an electronic signature system using bcrypt-based hashed PIN authentication, supporting compliance with 21 CFR Part 11 requirements for secure electronic records and signatures.
- Developed and executed database migration scripts using .NET to manage schema versioning across development, testing, staging, and production.
- Implemented authentication and user management using Azure AD B2C across a .NET backend and React frontend, enabling secure user onboarding, identity management, and automated email notifications upon user provisioning.
- Designed and implemented role-based access control (RBAC) to manage user permissions, ensuring different user roles could securely access specific application pages and functionality.
- Developed a customizable workflow template builder using React Flow, enabling users to visually design and configure reusable templates within application workflows.
- Developed and maintained REST APIs using Node.js and .NET, documented with OpenAPI (Swagger), to enable reliable communication between frontend and backend services.
- Built an end-to-end test automation framework using Playwright and Cucumber (BDD), integrated with JIRA Xray via secure credentials, enabling automated test execution results to sync directly to Xray and populate test cases with pass/fail outcomes.

TECHNOLOGIES

Frontend

- React
- JavaScript, TypeScript
- Next.js
- Vue.js
- UI/UX Design in Figma
- ChakraUI, BootstrapVue
- TanStack Forms
- Tailwind CSS

Backend

- Node.js
- .NET
- REST APIs
- OpenAPI / Swagger
- Azure AD B2C

Cloud & DevOps

- AWS
- Microsoft Azure Services
- Docker
- CI/CD Pipelines

Database

- SQL/ Database Migrations
- Schema Versioning

Testing

- Jest, Vitest
- Ladle (Visual Component Testing)
- Playwright-BDD

Tools & Workflow

- Git / GitHub
- Azure DevOps
- Agile / Scrum
- Jira / Xray

IT SUPPORT OFFICER

Interknit | Branberry, Ballarat

NOVEMBER 2022 - JUNE 2023

- Installed and configured computer hardware and critical software.
- Investigated and resolved software support requests, including barcode installations.
- Delivered technical assistance for system, hardware, and application issues.
- Maintained accurate IT inventory and asset management records.

EDUCATION AND TRAINING

Master of Technology (Software Engineering)

Federation University Australia

JUNE 2021 - DECEMBER 2023

Microsoft Certified: Azure Fundamentals

Microsoft, Online

JANUARY 2025

<https://learn.microsoft.com/en-us/credentials/certifications/azure-fundamentals/>

PROJECTS

AI-Based Document Comparison System (Master's Final Project)

Federation University Australia

JUNE 2023 – NOVEMBER 2023

- Built a full-stack web application using AI models to automatically compare and analyse documents, identifying differences and similarities across submissions.
- Designed and implemented a document verification workflow that reduced manual comparison effort in credit exemption processing.
- Developed an intuitive upload and review interface, enabling users to efficiently manage and compare documents side by side.

Personal Portfolio Website - dhuvarrish.com

- Built and deployed a full-stack portfolio application with a Next.js frontend on AWS Amplify with GitHub CI/CD, a C# .NET Web API backend on EC2 via Docker, and a custom Cloudflare domain with subdomain routing.
- Implemented clean architecture on the .NET backend with dependency injection and separated service layers, and a responsive UI using Tailwind CSS and shadcn/ui with adaptive navigation for desktop and mobile.
- Showcased two projects inside the app - a cloud-native AWS microservices SaaS dashboard and a REST API demo (each documented with a STAR-method). Each with architecture diagrams and live interactive demos.

SKILLS

- Full Stack Web Development
- Software Architecture & Design
- Cloud & Microservices Architecture
- REST API Design & Integration
- Database Design & Migration
- DevOps & CI/CD Practices
- Test-Driven Development & Automated Testing
- Agile / Scrum Development

COMMUNITY INVOLVEMENT

Secretary of Ballarat Association of Residential Students

NOVEMBER 2021 – NOVEMBER 2023

- Scheduled executive meetings and documented minutes.
- Maintained official records and ensured data accuracy.

City Of Ballarat Youth Awards

WINNER in 2022

- Awarded for outstanding leadership and contribution to the student community through mentoring and guiding peers.
